What are the errors you have encountered on both Versions

There seems to be two different types of bishops, changing selection between these will cause a bug in the direction outline of bishop 2, making it move like a queen.

How would you suggest I improve both games?

Make lootboxes not overlap tiles to make more challenge in getting their rewards. in alternate, there where pieces overlapping also(PC). Instructions could be clearer and should take the form of an interactive tutorial. The timewatch on lootbox was a lot bigger, this is not needed.

In both alternate and lootbox i found the concept of the game (objective) confusing, i think an explanation of the piece changing each move should be involved in the development of the game. An example would be moving a knight would change into a pawn, after moving this pawn it would then become a queen.

what version did you prefer

Lootbox

Why did you prefer the one you choose

I chose lootbox as it added a new level of complexity to the game of chess, however, these small changes I suggested would vastly improve this game.

What are the errors you have encountered on both Versions

only UI errors: instructions,the game ending message and lootboxes were not displayed properly on my screen

How would you suggest I improve both games?

UI iprovementns the UX would have been fine if instructions were visable

What are the errors you have encountered on both Versions

You could play the same piece into the same square as another piece

How would you suggest I improve both games?

Allowing for one piece max in each square

Time spent on Lootbox Game (minutes)

What are the errors you have encountered on both Versions

maybe the boxes at for the chess game should be more at the center of the square yokes.

How would you suggest I improve both games?

the queen or the king for the chess yoke should be more aggressive w spice. make it harder to beat the level.
