What are the errors you have encountered on both Versions

none

How would you suggest I improve both games?

Maybe a bigger font size or instructions!

What are the errors you have encountered on both Versions

Nothing as of late, haven't got any errors while testing out about versions of the game

How would you suggest I improve both games?

I would suggest placing a legend beside the board, as not all people who would play have knowledge of the game of chess. I would also recommend improving the AI for the opponent as it seems a bit too easy to beat

What are the errors you have encountered on both Versions

Couldnt exit game had to use "alt + F4"

I really tried to lose the game but I could never get the enemy to take all my pieces.

I didn't understand what was going on with the boxes initially I think instructions somewhere on the page would be a good idea.

^^^These apply to both games

How would you suggest I improve both games?

Make it harder.
maybe introduce lives.
Have an exit button

What are the errors you have encountered on both Versions

Text after victory was half hidden by the chess board

How would you suggest I improve both games?

Apart from that game played smoothly and sounds were good

What are the errors you have encountered on both Versions None to my knowledge

How would you suggest I improve both games? More clarity on what the user is trying to accomplish.

Time spent on Lootbox Game (minutes) 3

Time spent on Alternate Game(minutes) 2

what version did you prefer

Why did you prefer the one you choose I had no idea what the alternative was, I think every time you capture a lootbox with the knight, you then spawn another knight. Very hard to understand what was going on.

What are the errors you have encountered on both Versions

No errors

How would you suggest I improve both games?

I think maybe I could have got a slight more of an understanding of when I land the mystery box (Lootbox) or new pink chess piece (Alternate); sometimes a new chess piece is added and some times it changes the current chess piece into the new one. What circumstances adds a new chess piece when landing on mystery box(lootbox)/pink chess piece(alternate) and what circumstance does my current piece change to the new chess piece without adding a new one? This may be something clear to others that maybe I did not pick up on or maybe I didnt quite understand

Time spent on Lootbox Game (minutes)

30

Time spent on Alternate Game(minutes)

15

what version did you prefer

Lootbox

Why did you prefer the one you choose

From what I understood the boxes in the Lootbox game acted as mystery boxes and you didnt know what chess piece you were going to get out of it.
Overall I think it is very creative the way the game was made having just a few chess pieces on the board.
